

Add Audio to Video

Select files to upload and add:

Video File

No file chosen

Audio File

No file chosen

(total max total file size 200 MB)

Options:

Volume:

Position: second

(confirm you agree to [terms](#))

This video tool can help you add or replace background audio and music in a video file, you can replace the audio in the video, or just add new audio to the video while retaining the old. The resulting video has the same duration as the original video, and if the new audio is shorter than the source video, audio will automatically loop. You can set the volume and start position of the newly added audio. The output format is MP4 format.
