Add Audio to Video

Select files to upload and add:

Video File

[Choose File] No file chosen

Audio File

[Choose File] No file chosen

(total max total file size 200 MB)

Options: [Replace Audio in Video ⌄]

Volume: [Default ⌄]

Position: [Default ⌄] second

[Add] (confirm you agree to terms)

This video tool can help you add or replace background audio and music in a video file, you can replace the audio in the video, or just add new audio to the video while retaining the old. The resulting video has the same duration as the original video, and if the new audio is shorter than the source video, audio will automatically loop. You can set the volume and start position of the newly added audio. The output format is MP4 format.

Options:

- Replace Audio in Video, old audio in video will be removed.
- Keep Audio in Video, add new audio to the video as background music.

How To Use:

1. Select a video file (such as *.mp4, *.mkv, *.avi, *.wmv, *.flv, *.mov, *.vob, *.3gp, *.rmvb, *.mts, *.m2ts, *.rm, *.divx, *.asf, *.webm and more).

2. Select a audio file (such as *.mp3, *.wav, *.midi or *.wma).
